## DIVA II™

"A seismic step up for those currently living with entry-level analogue"

Amazing audiophile quality with an entry-level price tag.

DIVA II, now comes complete with quality 5.5kg aluminium platter, easy to set up and install, you'll be rediscovering your music in no time.

Sharing the same philosophy as our more expensive designs, DIVA II has a true audiophile engineered quality.

Such as our unique sapphire bearing and clamping system which efficiently channels unwanted vibrations away from the record to the chassis. This gives new clarity to your vinyl; the performance is not veiled but vivid and transparent.

Isolating the main chassis is critical to maintaining low colouration. We have employed an encased tri-layer elastomer suspension system, resulting in better information retrieval and resolution.

DIVA II offers people the chance of opening a window to quality audiophile vinyl reproduction, without feeling its "just another turntable"

It's reassuringly an AVID turntable without breaking the bank.

SPECIFICATIONS	
<b>DRIVE</b>	Single Belt Drive
<b>SPEEDS</b>	33.3 & 45.0 RPM
